

PLEX Customer Segmentation

#	Customer Segment	Who they are	Main need / pain point	Typical behavior	PLEX value proposition	Business value
1	P2P Traders & Liquidity Clients	P2P traders, arbitrage users, professional/high-frequency crypto traders	Constant crypto/fiat liquidity; banking/compliance friction from informal P2P activity; reliable execution	Very frequent transactions, recurring volume, rate-sensitive	Reliable crypto ↔ fiat liquidity through a licensed VASP, with transparent and documented transactions	 Very High — frequency + retention
2	Crypto Traders & Investors	Active traders, investors, Web3 users, long-term crypto holders	Cash out profits or move fiat back into crypto efficiently	Recurring or market-driven transactions; medium/high checks	Fast, secure crypto ↔ fiat exchange with competitive rates	 High
3	Expats, Remote Workers & Freelancers	Foreign residents, IT professionals, freelancers, remote workers receiving income in crypto/stablecoins	Regularly convert crypto income into GEL/USD/EUR; want a trustworthy local service	Usually recurring monthly transactions	A simple and compliant way to turn crypto income into usable fiat in Georgia	 High — predictable retention

4 VIP / HNWI Clients	High-net-worth individuals, founders, large investors and high-volume crypto holders	Large transactions, discretion, liquidity, speed, personalized rates and premium support	Large checks; frequency varies	Dedicated service, personalized rates and priority execution for high-value transactions	 Very High — transaction value
5 Real Estate Buyers & Investors	Foreign/local property buyers, investors and people using crypto capital to purchase property	Convert significant crypto holdings into fiat for property transactions; documentation and source-of-funds requirements	Large but relatively infrequent transactions	Compliant conversion of crypto capital for major purchases, with appropriate transaction documentation	 Very High — large ticket
6 Business / B2B Clients	SMEs, entrepreneurs, crypto/Web3 companies and businesses with crypto-related flows	Corporate crypto ↔ fiat conversion, reporting, documentation and dedicated support	Recurring transactions with potentially high volume	Professional crypto ↔ fiat infrastructure for businesses with dedicated support and reporting	 Very High — recurring B2B revenue

7 Auto & Other High-Value Purchase Clients	Car buyers/dealers and clients converting crypto for other major purchases	Quickly convert crypto into fiat for a specific transaction	Medium/high check, situational frequency	Fast and documented crypto-to-fiat conversion for major purchases	 Medium–High
8 New / First-Time Crypto Users	People making their first crypto exchange or unfamiliar with VASP services	Trust, security, education and assistance	Low initial frequency; small/medium checks	A simple, guided and secure way to exchange crypto	 Growth Potential
9 Tourists & Short-Term Visitors	Tourists and temporary visitors in Tbilisi/Batumi who hold crypto	Need convenient access to fiat while in Georgia	Mostly one-off or occasional	Convenient crypto ↔ cash exchange while we're in Georgia	 Medium / seasonal

Brand & User behavior

1. What PLEX Is

PLEX is a licensed crypto–fiat exchange in Georgia.

But we do not want customers to see PLEX as simply a place to exchange USDT, USD or GEL.

PLEX is your crypto exchange partner.

The customer has a goal — receive money, buy crypto, cash out, buy property, make a business payment, solve an unusual transaction — and PLEX helps them make the next move.

NEXT MOVE IS PLEX.

2. How PLEX Should Feel

Think of PLEX as a person.

PLEX is:

Friendly — easy to approach and communicate with.

Expert — knows crypto and knows how to solve problems.

Reliable — someone customers trust with important transactions.

Fast — no unnecessary complexity or wasted time.

Premium — polished service, environment and communication.

Stylish & modern — contemporary finance, technology and lifestyle.

Helpful — the customer should feel: *“Whatever happens, these people will know what to do.”*

PLEX should never feel cold, overly corporate or complicated.

The ideal perception is:

“I have people I can call when I need anything related to crypto exchange.”

3. Who Our Customers Are

1. Everyday Crypto Users

Expats, freelancers, remote workers, tourists and people receiving income in crypto.

Typical needs:

- USDT → USD/GEL
- cash → USDT
- salary or freelance payments

- travel and everyday expenses

They care most about:

rate + convenience + speed + trust + clear communication.

Content for them should make crypto exchange look **simple and accessible.**

2. Expats & International Customers

People living or working in Georgia who move between countries, currencies and crypto.

They especially value:

- English-speaking service
- predictable processes
- trustworthy local support
- convenient locations
- someone who can explain and help

The feeling should be:

“I know who to contact in Georgia.”

3. High-Value Private Clients

Entrepreneurs, investors, property buyers/sellers, car buyers and customers making larger transactions.

They care about:

- professionalism
- privacy
- liquidity
- reliability
- speed
- personal support

They don't need loud crypto marketing.

They need to feel:

“PLEX can handle serious transactions professionally.”

4. Active Traders

Customers exchanging frequently who already understand wallets, USDT, networks and rates.

They care about:

- competitive rates
- liquidity
- speed
- reliability
- easy communication when something unusual happens

They need to feel:

“These people understand my world and can execute.”

5. Business Customers

Real-estate companies, developers, car dealers, exporters, entrepreneurs and other businesses working with crypto.

They are looking for more than one transaction.

They need a **reliable long-term crypto exchange partner**.

Content should show that PLEX understands **business as well as crypto**.

4. The Most Important Customer Insight

People rarely exchange crypto just because they want to “exchange crypto.”

There is usually something behind the transaction.

They may be:

- receiving their salary;
- buying a car;
- purchasing property;
- traveling;
- running a business;
- receiving international payment;
- moving savings;
- taking profit from crypto.

Crypto is the mechanism. The customer's life is the story.

This should be one of the main principles behind PLEX video content.

5. What PLEX Gives Customers

Every piece of content should communicate at least one of these values:

TRUST

Licensed, secure, professional and transparent.

SPEED

The customer needs to make a move. PLEX helps them do it quickly.

HUMAN SERVICE

There are real people who answer, explain and solve problems.

EXPERTISE

The customer doesn't need to understand everything alone.

CONVENIENCE

Clear communication, physical locations and simple processes.

PREMIUM SERVICE

Attention, professionalism and a high-quality customer experience.

6. What We Want People to Think After Seeing PLEX Content

After seeing several PLEX videos, the audience should gradually think:

“They know crypto.”

“They look trustworthy.”

“They will help me if something goes wrong.”

“This looks premium but approachable.”

“They make crypto easier.”

And finally:

“PLEX is my crypto exchange.”

7. PLEX Visual & Communication Style

The world of PLEX should include:

modern city life / business / travel / technology / international lifestyle / real customers / real employees / real PLEX locations.

People should be central to the content.

Show:

- customers entering PLEX;
- employees helping customers;
- conversations;
- real transactions;
- smartphones and digital interactions;
- customers continuing with their day after solving what they needed.

PLEX should feel closer to:

modern fintech + premium hospitality + technology + lifestyle

than stereotypical crypto advertising.

8. What We Should Avoid

Avoid typical crypto clichés:

- floating Bitcoin coins everywhere;
- hackers and hoodies;
- cyberpunk/neon visuals;
- Lamborghinis and “get rich” imagery;
- excessive trading charts;
- complicated terminology;
- aggressive investment promises.

PLEX isn't selling the fantasy of crypto.

PLEX makes crypto useful in real life.

9. Simple Formula for PLEX Videos

A strong PLEX video can often follow this structure:

1. Situation

The customer needs something.

2. Problem / friction

They don't want delays, complexity or uncertainty.

3. PLEX

PLEX understands the situation.

4. Solution

The transaction gets handled.

5. Next move

The customer continues with what actually matters.

Examples:

Received USDT → PLEX → enjoy your money.

Buying property → PLEX → complete the deal.

Need cash today → PLEX → move on with your day.

Business needs crypto → PLEX → business continues.

10. Main Content Directions

Production should build content around five main areas:

PRODUCT

What PLEX does, exchange scenarios, locations and services.

CUSTOMER STORIES

Real-life reasons people use PLEX.

EDUCATION

Simple explanations about crypto, USDT, networks and security.

EXPERTISE & TRUST

PLEX team, professional knowledge, real locations and processes.

BRAND & LIFESTYLE

Stylish content connecting PLEX with modern city life, business, travel and movement.

NEXT MOVE IS PLEX.
